IDENTIFIERS Education Consolidation Improvement Act Chapter 1; *Migrant Education Program

ABSTRACT

This is the first of two volumes of a report summarizing participation and achievement information from the 1985-86 school year of the Education Consolidation and Improvement Act Chapter 1 Migrant Education Program. This volume presents the participation information provided by state educational agencies (SEAs). Of the 366,353 migrant education program participants in the period 1985-86, 75% were Hispanic and 12% were White. Fifty-three percent of the participants were settled-out migratory youths (formerly migrant), 29% were interstate migratory youths, 18% were intrastate migrants. There were 323,601 participants in the regular term, and 112,350 during the summer term, representing increases over the previous year. The largest percentage of migrant students in both the regular term (56%) and the summer term (60%) were in grades 1-6. Attendance and guidance services were provided to the largest number of participants (44%) during the regular term, followed by reading (41%) and mathematics (28%). During the summer term, 58% of the participants were provided with reading instruction and 56% with math instruction. Transportation, nutrition services, and attendance and guidance counseling were received by more than half of the summer participants. There were 12,014 full-time equivalent staff funded by the migrant education program in the regular term and 10,753 during the summer term. Teachers outnumbered teacher aides during the summer, whereas the converse was true during the regular term. Total regular term staff experienced a 14% decline from the 1984-85 regular term, but the summer staff increased 12% over the previous summer term. The document contains about 45 tables and graphs. Appendices provide information about methodology and statistics broken down by state. (TES)

CONTRACT NO. 300-86-0094

MARCH 1988

This report was prepared pursuant to Contract Number 300-86-0094, U.S. Department of Education. The cost of the project was $75,000. The opinions and conclusions expressed in this report are those of the authors and do not necessarily represent the position or policies of the U.S. Department of Education.

ACKNOWLEDGMENTS

We wish to thank the many individuals who contributed to the completion of this report. Particularly helpful to our efforts were several individuals in the U.S. Department of Education. James English of the Office of Planning, Budget, and Evaluation, who served as our Project Officer, and William Stormer, Dustin Wilson, and Daisy Greenfield of the Migrant Education Program provided us with direction and guidance throughout the study.

We are also grateful to the Chapter 1 Migrant directors and program evaluators in each state for their cooperation and assistance in verifying the information submitted on the State Performance Reports for 1985-86.

Our special thanks go to Mary Moore of DRC for her continual support and advice. Other DRC staff who deserve special recognition include Leslie Anderson for cheerfully assembling the state level tables and Saunders Freeland for her expert typing of this document.

A SUMMARY OF STATE CHAPTER 1 MIGRANT EDUCATION PROGRAM PARTICIPATION AND ACHIEVEMENT INFORMATION FOR 1985-86

EXECUTIVE SUMMARY

This report encompasses two volumes and summarizes the participation and achievement information provided by state educational agencies (SEAs) on the ECIA Chapter 1 Migrant Education Program for the 1985-86 school year. The 1985-86 school year was the second year in which SEAs were required to submit participation information using a prescribed format (the State Performance Report). For achievement information, statewide data summaries were requested, although no specific format was required.

This volume presents the participation information, while Volume 2 provides the achievement information.

From discussions with SEAs about the State Performance Report information, it appears that, for the most part, state officials believe that the data reporting requirements were better understood for the second year's submission. As a result, more accurate and complete information was reported for the 1985-86 school year than had been reported for the 1984-85 school year.[1]

Of the 366,353 total migrant education program participants (as categorized by ethnic group) in 1985-86, 75 percent were Hispanic and 12 percent were white.

In 1985-86, 53 percent of the participants, as classified by migrant status, were settled out migratory youths (formerly migrant), 29 percent were interstate migratory youths (currently migrant across states), and 18 percent were intrastate migratory youths (currently migrant within a state). Only 3 percent of the participants were classified as children of migratory fishers.

There were 323,601 participants in the regular term, and 112,350 in the summer term in 1985-86. The largest percentage of participants in both the regular term (56 percent) and the summer term (60 percent) were in grades 1-6.

---

[1]SEAs were provided the opportunity to review the submitted State Performance Report information. In several instances, SEAs revised data for either 1984-85 or 1985-86. To the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

The number of participants increased from 1984-85 to 1985-86 in both the regular term (4 percent) and the summer term (11 percent). Increases were experienced in each grade span in both terms. In the regular term, the increases ranged from 3 to 5 percent. In the summer term, the increases ranged from 5 percent in grades 1-3 to 23 percent in grades 7-9 and 31 percent in grades 10-12.

Attendance and guidance, and reading were provided to the largest percentage of participants in the regular term -- 44 percent of the participants received attendance and guidance services, and 41 percent received reading. Mathematics services were received by 28 percent of the participants.

Reading and mathematics were provided to the largest percentage of participants in the summer term -- 58 percent of the participants received reading services, and 56 percent received mathematics. Three additional services were received by over one-half of the participants -- transportation (56 percent), attendance and guidance (55 percent), and nutrition (51 percent).

In general, there was a growth from 1984-85 to 1985-86 in the number of participants receiving supporting services.

In 1985-86, there were 12,014 full-time equivalent staff funded by the migrant education program in the regular term, and 10,753 in the summer term. Teachers and teacher aides composed 69 percent of the total staff in both terms. Differences were seen in the distribution of staff in each term. In the regular term, there were more teacher aides (43 percent) than teachers (26 percent), whereas in the summer term, there were more teachers (40 percent) than teacher aides (29 percent).

From 1984-85 to 1985-86, total staff experienced a decline (14 percent) in the regular term, but increased 12 percent in the summer term.

INTRODUCTION

Recognizing that the migratory children of migratory farm workers were disadvantaged, P.L. 89-750 was enacted in November 1966, amending Title I of the Elementary and Secondary Education Act (ESEA), to authorize a program of services for these youths. The migrant education program, now authorized by Sections 141-143 of Chapter 1 of the Education Consolidation and Improvement Act (ECIA), provides funds to state educational agencies (SEAs) for "programs and projects...which are designed to meet the special educational needs of migratory children of migratory agricultural workers or of migratory fishermen, and to coordinate such programs and projects with similar programs and projects in other states, including the transmittal of pertinent information with respect to school records of such children" (Section 142).

Sections 555(d) and (e) of Chapter 1, respectively, specify SEA responsibilities for (1) maintaining records and information, and (2) conducting evaluations and collecting data. These sections state:

> (d) Records and Information: Each State educational agency shall keep such records and provide such information to the secretary as may be required for fiscal audit and program evaluation (consistent with the responsibilities of the Secretary under this chapter).
>
> (e) Evaluation: Each State educational agency shall-
>
> (1) conduct an evaluation of the programs assisted under this chapter at least every two years and shall make public the results of that evaluation; and
>
> (2) collect data on the race, age, and gender of children served by the programs assisted under this chapter and on the number of children served by grade-level under the programs assisted under this chapter.

The Department of Education (ED) published rules and regulations pertaining to these requirements in the Federal Register (7/1/86 Edition). In reference to the evaluation requirement, the Department wrote:

> §204.23 Evaluation.
>
> (a) SEA evaluation. (1) Each SEA shall-

(i) Conduct an evaluation of the Chapter 1 programs in the State at least once every two years and make public the results of that evaluation; and

(ii) Collect data annually on-

(A) The race, age, and gender of children served by the Chapter 1 programs in the State; and

(B) The number of children served by grade level under the Chapter 1 programs in the State.

(2) To meet the requirements in paragraph (a)(1)(i) of this section, the SEA may, for each Chapter 1 program, aggregate evaluation data collected under paragraph (b)(1)(i) of this section to obtain Statewide totals.

While these requirements obligated SEAs to report annual data to the federal government, ED did not specify the format nor provide guidelines for the information to be collected. As a result, states developed their own locally relevant criteria for collecting participation information.

In 1983, however, the General Counsel determined that all SEAs were required to submit standardized information on the migrant education program to the Department of Education. To implement this decision, ED solicited input from SEAs on the most appropriate measures and assembled a standard format for reporting of the participation information. The resulting standard form (the State Performance Report) received final approval by the Office of Management and Budget (OMB) in the spring of 1985. The 1984-85 school year was the first year of data collection using this form.

This report summarizes the 1985-86 State Performance Reports for the ECIA Chapter 1 Migrant Education Program.[2] The information for the 1985-86 school year was submitted by the SEAs in the winter and early spring of 1987. These performance reports provide information on the number of participants (by gender, year of birth, ethnic group, migrant status, and grade by regular term/summer term), the types of services provided (by regular term/summer term), the number of staff (by regular term/summer term), and achievement. The participation information, collected and reported according to the prescribed format, is presented here in Volume 1. For achievement, statewide data summaries are requested, and any format desired by the SEA can be used. Volume 2 provides a description of the achievement information submitted by the SEAs for the 1985-86 school year.

---

[2]In 1985-86, State Performance Reports were received from 49 states, the District of Columbia, and Puerto Rico. Hawaii does not participate in the migrant education program.

From discussions with SEAs about the State Performance Report information, it appears that, for the most part, state officials believe that the data reporting requirements were better understood for the second year's submission.[3] As a result, more accurate and complete information was reported for the 1985-86 school year than had been reported for the 1984-85 school year.[4]

The remainder of this document presents the national participation and staffing information in two ways: (1) for 1985-86, and (2) changes from 1984-85 to 1985-86. The information is discussed in the following order:

- participation by ethnic group,
- participation by migrant status,
- participation by gender and year of birth,
- regular term participation patterns by grade and by service area,
- regular term staffing,
- summer term participation patterns by grade and by service area, and
- summer term staffing.

A description of the methodology used to review the State Performance Report information for 1985-86 is presented in Appendix A. State level participation and staffing information for 1985-86 is provided in Appendix B, while Appendix C displays year-to-year changes by state for the two years (1984-85 and 1985-86) for which the information has been collected.

---

[3]To the extent that data limitations were enumerated by SEAs, these cautions are provided in the text and in the accompanying tabular displays of the information in this report.

[4]SEAs were provided the opportunity to review the submitted State Performance Report information. (See Appendix A for a description of the methodology used.) In several instances, SEAs revised data for either 1984-85 or 1985-86. To the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

PARTICIPATION BY ETHNIC GROUP

In 1985-86, there were 366,353 participants in migrant education programs, as classified by ethnic group. Hispanics composed the largest group -- 75 percent of the participants were Hispanic. The next largest ethnic group was white, at 12 percent. The remaining groups -- American Indians or Alaskan Natives, Asians or Pacific Islanders, and blacks -- each composed 5 percent or less of the total. (Figure 1)

In two-thirds of the states, 50 percent or more of the migrant participants were Hispanic in 1985-86. Moreover, an examination of the total number of participants, as categorized by ethnic group, shows that five states (Arizona, California, Florida, Michigan, and Texas) reported nearly two-thirds of the total number of participants. (Table B.1)

Nationally, there was a 5 percent increase from 1984-85 to 1985-86 in the total number of participants, as categorized by ethnic group. The largest group in both years was Hispanic. The large increase (92 percent) in American Indians or Alaskan Natives was due primarily to the increase reported in Alaska. The distribution in each year was roughly the same -- with the unknown/other group decreasing significantly. (Table 1)

In reviewing the information in this category, two data items should be noted. First, Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.[5] Second, in both years, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

---

[5]This data note will apply to all categories of information submitted by Michigan on the State Performance Reports for both years.

FIGURE 1

MIGRANT EDUCATION PARTICIPATION BY ETHNIC GROUP — 1985-86

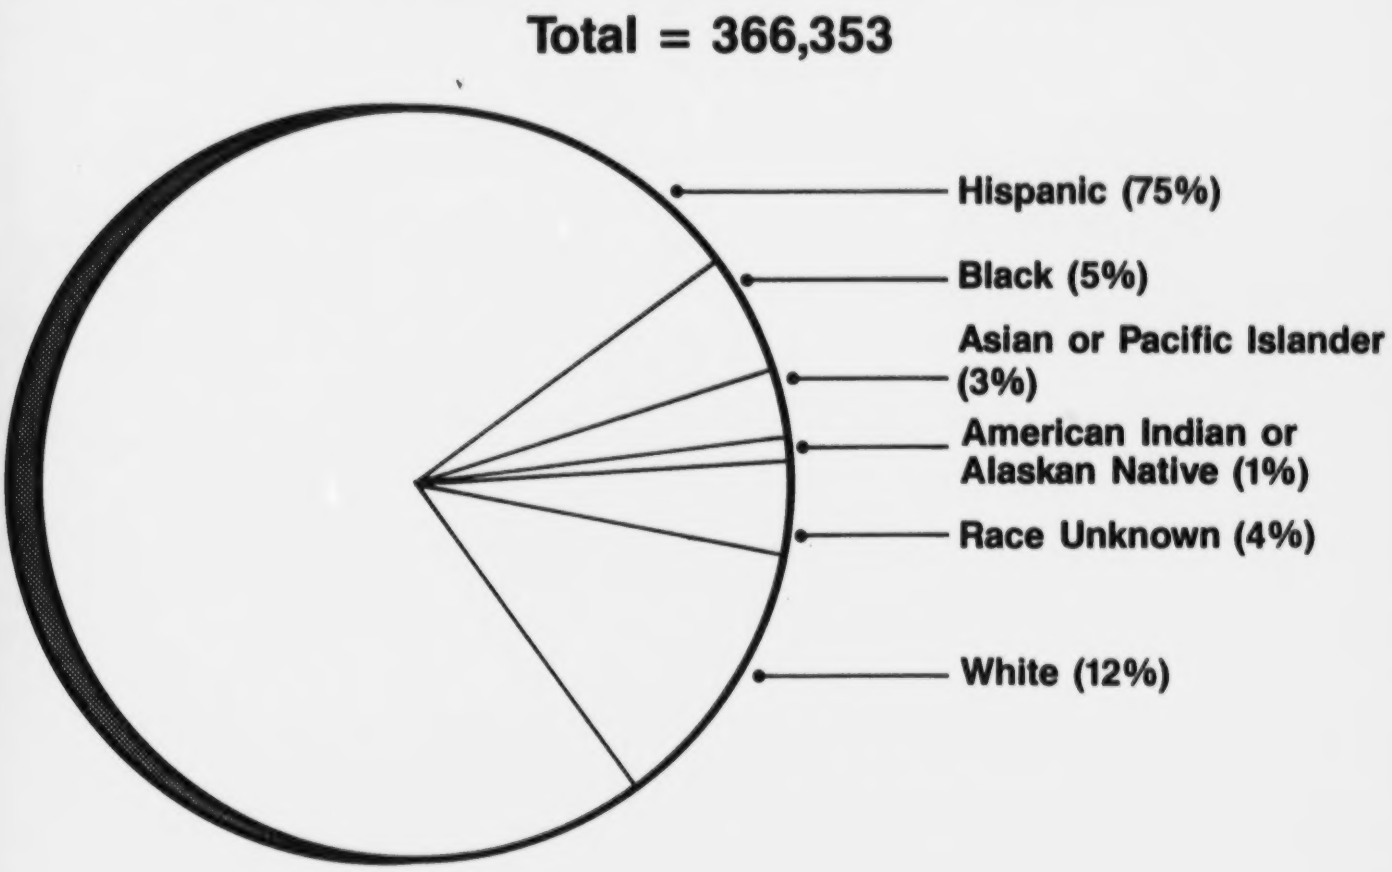

Table 1

Ethnicity of Chapter 1 Migrant Education Participants --
1984-85 and 1985-86[a/]

Ethnic Group	1984-85 Number	1984-85 (Percent)	1985-86 Number	1985-86 (Percent)	Percent Change in Number From Previous Year
American Indian or Alaskan Native	2,359	(1)	4,534	(1)	92[b/]
Asian or Pacific Islander	10,906	(3)	12,064	(3)	11
Black, Not Hispanic	20,700	(6)	18,659	(5)	-10
Hispanic	241,117	(69)	272,549	(75)	13
White, Not Hispanic	42,868	(12)	43,603	(12)	2
Race Unknown/ Other	31,580	(9)	14,944	(4)	-53
Total[c/]	349,530	(100)	366,353	(100)	5

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

b/ One state (Alaska) reported an increase in American Indians or Alaskan Natives participants from 456 in 1984-85 to 2,545 in 1985-86; this increase accounted for 96 percent of the reported increase.

c/ In 1985-86, six states (Alaska, Massachusetts, Michigan, New Jersey, Pennsylvania, and Texas) did not report the same totals by ethnic group, migrant status, gender, and year of birth. As a result, the totals on Tables 1, 2, 4 and 5 are not exactly the same.

PARTICIPATION BY MIGRANT STATUS

The total number of participants reported in 1985-86 classified by migrant status (Figure 2 and Table 2) was not the same as the total classified by ethnic group (as seen previously in Figure 1 and Table 1). The principal reason for the difference is that Texas reported 71,628 participants by ethnic group and 87,119 by migrant status. The number reported by migrant status included students identified but not necessarily served.

Slightly over one-half of the participants in 1985-86 were agricultural settled out (formerly migrant), followed by 29 percent agricultural interstate (currently migrant across states), and 17 percent agricultural intrastate (currently migrant within a state). Fishers composed 3 percent of the total. (Figure 2)

Over three-fourths of the participants who were classified as fishers were reported in two states (Alaska and Louisiana). (Table B.2)

The fairly high year-to-year changes in the numbers of participants by migrant status (over 20 percent in each migrant status category) can be explained, for the most part, by three key data issues. First, Texas and Washington did not report this information in 1984-85, but did provide it in 1985-86. Second, in 1985-86, Washington reported numbers separately for the regular and summer terms. These numbers for Washington were combined and, therefore, represent a duplicated count. Third, as discussed above, Texas reported additional students identified but not necessarily served by migrant status. (Table 2)

With these data issues in mind, the observed changes from 1984-85 to 1985-86 should not be considered as reflecting actual year-to-year shifts in the number of participants by migrant status. In fact, the percentage distribution in both years was virtually the same. Looking at the children of both agricultural workers and fishers, 53 percent of the participants were formerly migrant and 47 percent were currently migrant in both 1984-85 and 1985-86. (Table 3)

FIGURE 2

MIGRANT EDUCATION PARTICIPATION BY MIGRANT CATEGORY — 1985-86

* Less than 1 percent

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

Two states (Texas and Washington) did not report this information in 1984-85.

In 1985-86, Texas reported 87,119 participants by migrant status, and 71,628 participants by gender, by year of birth, and by ethnic group. The number reported by migrant status includes students identified but not necessarily served.

In 1985-86, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

b/ In 1985-86, six states (Alaska, Massachusetts, Michigan, New Jersey, Pennsylvania, and Texas) did not report the same totals by ethnic group, migrant status, gender, and year of birth. As a result, the totals on Tables 1, 2, 4 and 5 are not exactly the same.

Table 3

Current and Former Migrant Status of Chapter 1 Migrant Education Participants -- 1984-85 and 1985-86[a/]

	1984-85		1985-86	
Status	Number	(Percent)	Number	(Percent)
Currently				
Interstate	83,189	(30)	112,024	(29)
Intrastate	48,590	(17)	66,264	(18)
Formerly				
Settled Out	146,019	(53)	204,241	(53)
Total	277,798	(100)	382,529	(100)

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

Two states (Texas and Washington) did not report this information in 1984-85.

In 1985-86, Texas reported 87,119 participants by migrant status, and 71,628 participants by gender, by year of birth, and by ethnic group. The number reported by migrant status includes students identified but not necessarily served.

In 1985-86, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

PARTICIPATION BY GENDER AND YEAR OF BIRTH

In both 1984-85 and 1985-86, 52 percent of the migrant education program participants were male and 48 percent were female. Nationally, there was a 5 percent increase in the total number of participants, as classified by gender (the same increase as was seen in the number of participants as categorized by ethnic group). (Table 4)

For the year of birth information reported by states in 1985-86, one-half of the migrant education participants were born between 1974 and 1979, the years that can be considered to contain children of elementary school age. Thirty-four percent were born between 1968 and 1973, the years that can be considered to contain children of secondary school age. About 14 percent of the participants were born in the years 1980 to 1987, which can be considered to contain children eligible for kindergarten or younger. Participants born in 1964 through 1967 can be considered to be 18 years and older; this age group constituted only 2 percent of the participants. A similar distribution of migrant education participants was seen in 1984-85. (Table 5)

Table 4

Gender of Chapter 1 Migrant Education Participants --
1984-85 and 1985-86[a/]

Gender	1984-85 Number	1984-85 (Percent)	1985-86 Number	1985-86 (Percent)	Percent Change in Number From Previous Year

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

b/ These year of birth categories were chosen so that the years 1979-85 (in 1984-85) and the years 1980-87 (in 1985-86) can be considered to contain children eligible for kindergarten or younger; the years 1973-78 (in 1984-85) and the years 1974-79 (in 1985-86) can be considered to contain children of elementary school age; the years 1967-72 (in 1984-85) and the years 1968-73 (in 1985-86) can be considered to contain children of secondary school age; and the years 1964-66 (in 1984-85) and the years 1964-67 (in 1985-86) can be considered to contain children 18 years or older.

c/ In 1985-86, six states (Alaska, Massachusetts, Michigan, New Jersey, Pennsylvania, and Texas) did not report the same totals by ethnic group, migrant status, gender, and year of birth. As a result, the totals on Tables 1, 2, 4 and 5 are not exactly the same.

REGULAR TERM PARTICIPATION PATTERNS

PARTICIPATION BY GRADE

The largest number of participants were in grades 1-6 (56 percent), followed by 21 percent in grades 7-9, 12 percent in prekindergarten and kindergarten, and 11 percent in grades 10-12. (Ungraded participants composed only 1 percent of the total, and are not displayed in the figure.) (Figure 3)

There were 323,601 total participants in the regular term, an increase of 12,000 participants (4 percent) from 1984-85 to 1985-86. Increases were reported in each grade span; these increases were between 3 and 5 percent. (The number classified as ungraded decreased.) Moreover, the percentage distribution in each grade span was exactly the same in both years. (Table 6 and Figure 4)

A comparison of the number of migrant education participants in the regular term and the number of students enrolled in public elementary and secondary schools shows that, nationally in 1985-86, almost 1 percent of the students in public schools were migrant education participants. In nine states and Puerto Rico, this percentage was between 1 and 3 percent. (Table 7)

In both 1984-85 and 1985-86, three states (Montana, Nebraska, and Wyoming) did not offer migrant education programs in the regular term. One state (Rhode Island) did not offer a program in 1984-85, but did in 1985-86.

PARTICIPATION BY SERVICE AREA

In 1985-86, attendance and guidance services were received by the largest percentage of participants (44 percent), followed by reading (41 percent), health (33 percent), and mathematics (28 percent). (Figure 5)

The number receiving instructional services decreased in each service area from 1984-85 to 1985-86. Decreases from 10 to 15 percent were experienced in English to limited English background, reading, mathematics, and other instructional services. There was a 51 percent decline in the number receiving vocational services and a 43 percent decrease in the other language arts category. (Table 8)

At the same time, four of the six supporting service areas showed increases. The increases ranged from 3 percent in dental and nutrition to 35 percent in health and 44 percent in attendance and guidance. Decreases were reported in transportation and other supporting services of 21 and 16 percent, respectively. (Table 8)

Unduplicated Number of Participants	311,615		323,601		

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Montana, Nebraska, and Wyoming did not offer migrant education programs in the regular term. Rhode Island did not offer a program in the regular term in 1984-85, but did in 1985-86.

Many of the observed year-to-year changes can be explained, at least in part, by the shifts reported in the states with the largest number of migrant education program participants. For example, California reported fairly large decreases in the number of participants receiving each instructional service, thus accounting for much of the reported national decrease in the instructional services.

As another example, Texas reported fairly large increases in the number of participants receiving each supporting service. These increases affected the national data in two ways. First, they accounted for much of the reported national increase in those supporting service areas that experienced an increase. Second, they offset large declines reported in other states, resulting in less of a total decrease.

REGULAR TERM STAFFING

In 1985-86, there were 12,014 full-time equivalent (FTE) staff in the regular term funded by the migrant education program. Three categories of staff -- teachers, teacher aides, and curriculum specialists (those staff that can be considered to provide instructional services) -- composed nearly three-quarters of the total staff. In particular, teacher aides constituted 43 percent and teachers 26 percent of the total staff. The next largest percentage was supporting staff at 8 percent. (Figure 6)

From 1984-85 to 1985-86, total staff decreased 14 percent, about 2,000 FTE staff. Decreases were experienced in five of the eight staff categories. Three categories of instructional staff showed the largest decreases -- teachers decreased 24 percent, teacher aides 19 percent, and curriculum specialists 31 percent. Decreases were also evident among staff providing supporting services (15 percent) and administrative staff (1 percent). (Table 9)

Large increases were experienced in two staff categories -- recruiters increased by 25 percent and MSRTS data entry specialists by 80 percent. These increases can be explained, in large part, by the inclusion of 1985-86 data from Texas for these staff categories. (Table 9)

Shifts in those states with large numbers of participants tended to account for a major portion of the observed year-to-year changes (as was also noted in the discussion of participation by service area in the regular term). For example, an examination of the teacher information by state reveals that 27 states reported decreases in the number of FTE teachers, 11 states increases, and 9 states no change. However, two states with large numbers of teachers reported significant decreases, thus accounting, in large part, for the observed national decrease.

However, despite the various increases and decreases, the percentage distribution of staff in both years was quite similar. (Table 9)

FIGURE 6

MIGRANT EDUCATION FULL-TIME EQUIVALENT STAFF, REGULAR TERM — 1985-86

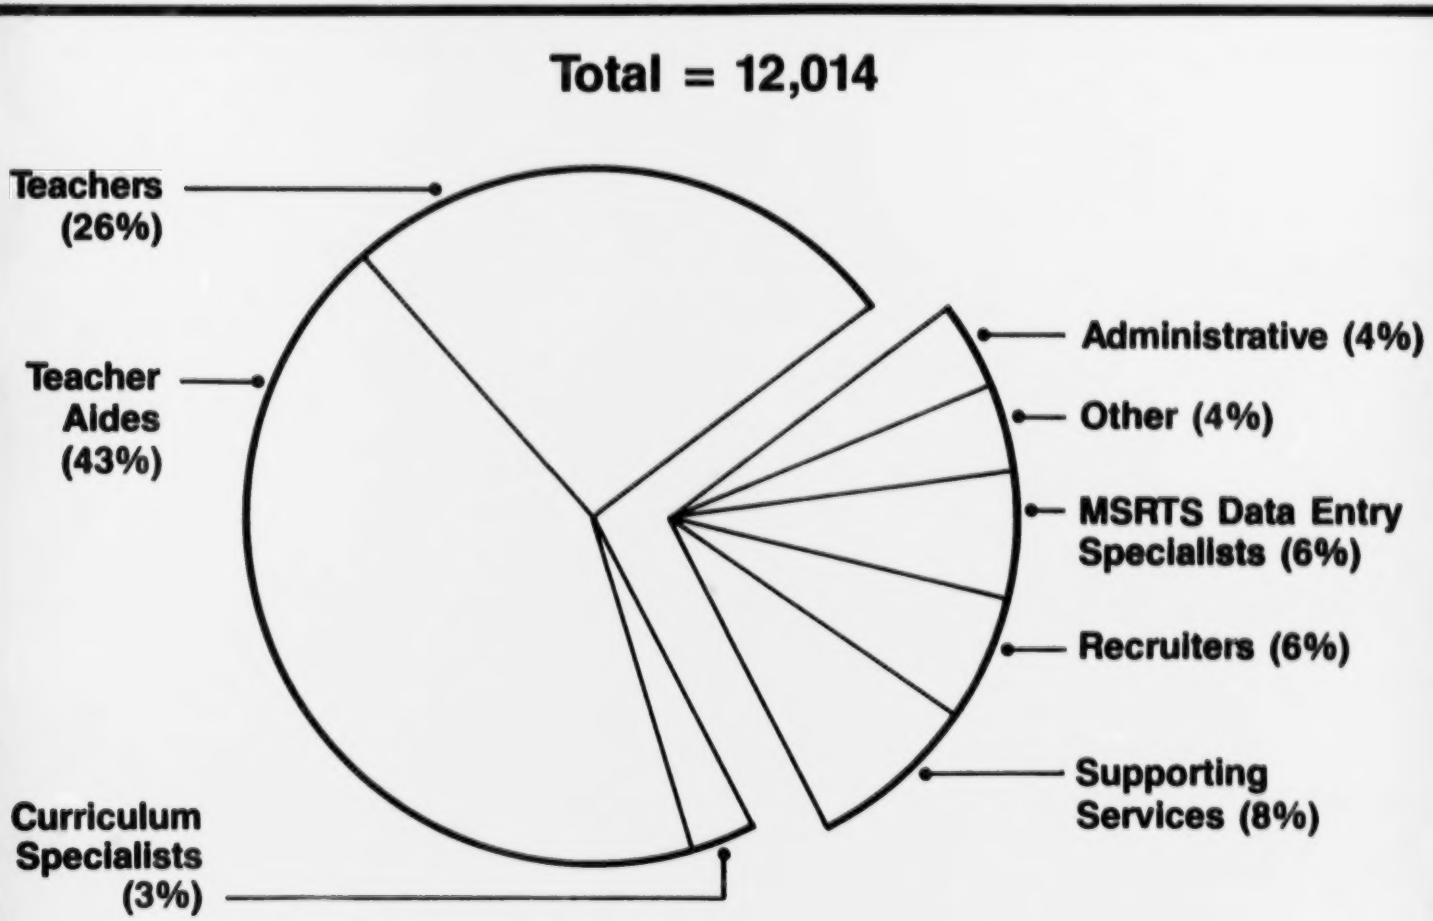

Table 9

Regular Term Full-Time Equivalent Staff Funded by the Chapter 1 Migrant Education Program -- 1984-85 and 1985-86[a/]

FTE Staff	1984-85 Number	1984-85 (Percent)	1985-86 Number	1985-86 (Percent)	Percent Change in Number From Previous Year
Administrative	454.4	(3)	451.1	(4)	-1

Other	435.2	(3)	514.0	(4)	18
Total	14,004.2	(100)	12,013.6	(100)	-14

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Montana, Nebraska, and Wyoming did not offer migrant education programs in the regular term. Rhode Island did not offer a program in the regular term in 1984-85, but did in 1985-86.

b/ One state (Texas) reported an increase of 172 recruiters (from 0 in 1984-85 to 172 in 1985-86).

c/ One state (Texas) reported an increase of 297 MSRTS data entry specialists (from 0 in 1984-85 to 297 in 1985-86).

SUMMER TERM PARTICIPATION PATTERNS

PARTICIPATION BY GRADE

The largest number of participants were in grades 1-6 (60 percent), followed by 20 percent in prekindergarten and kindergarten, 13 percent in grades 7-9, and 7 percent in grades 10-12. (Ungraded participants composed only 2 percent of the total, and are not displayed in the figure.) (Figure 7)

The distribution of participants by grade span was not the same in the regular term and in the summer term. While both terms had the largest percentage of participants in grades 1-6, the summer term had the next largest in prekindergarten and kindergarten, and the regular term's next largest percentage was in grades 7-9. In both terms, the smallest percentage of participants was in grades 10-12. (Figures 3 and 7)

There were 112,350 total participants in 1985-86, an increase of almost 11,500 participants (11 percent). There were increases in each grade span, ranging from 5 percent in grades 1-3 to 23 percent in grades 7-9 and 31 percent in grades 10-12. (The number classified as ungraded decreased.) Moreover, the percentage distribution in each grade span was similar in both years. (In examining year-to-year changes, note that in 1984-85, Texas did not report summer term participation by grade.) (Table 10 and Figure 8)

In both years, seven states (Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota) did not offer migrant education programs.

PARTICIPATION BY SERVICE AREA

In 1985-86, five services were provided to over one-half of the participants in the summer term -- reading services were received by the largest percentage of participants (58 percent), followed closely by mathematics and transportation (56 percent), attendance and guidance (55 percent), and nutrition (51 percent). (Figure 9)

The number receiving services increased in some service areas and decreased in other areas from 1984-85 to 1985-86. The largest increases were reported in three of the supporting service areas -- nutrition (50 percent), attendance and guidance (41 percent), and transportation (14 percent). Smaller increases were experienced in three of the instructional service areas -- reading (11 percent), mathematics (2 percent), and other instructional services (11 percent). At the same time, year-to-year decreases ranged from 3 percent in other language arts to 52 percent in vocational services. (In examining year-to-year changes, note that in

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota did not offer migrant education programs in the summer term.

One state (Texas) did not report summer term participation by grade in 1984-85.

FIGURE 8

MIGRANT EDUCATION PARTICIPATION BY GRADE SPAN, SUMMER TERM — 1984-85 AND 1985-86

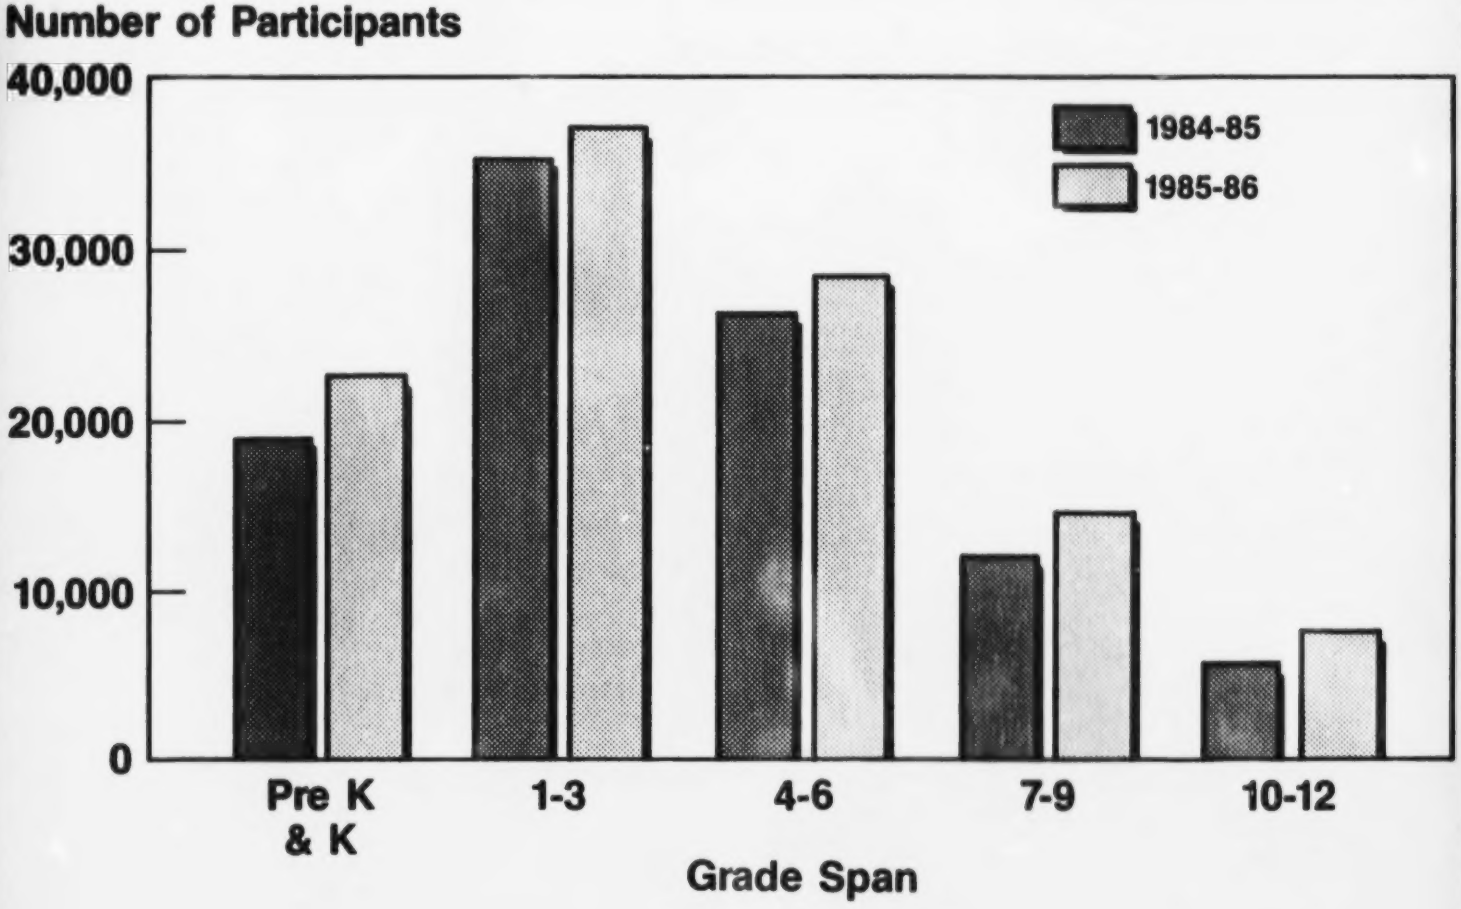

FIGURE 9

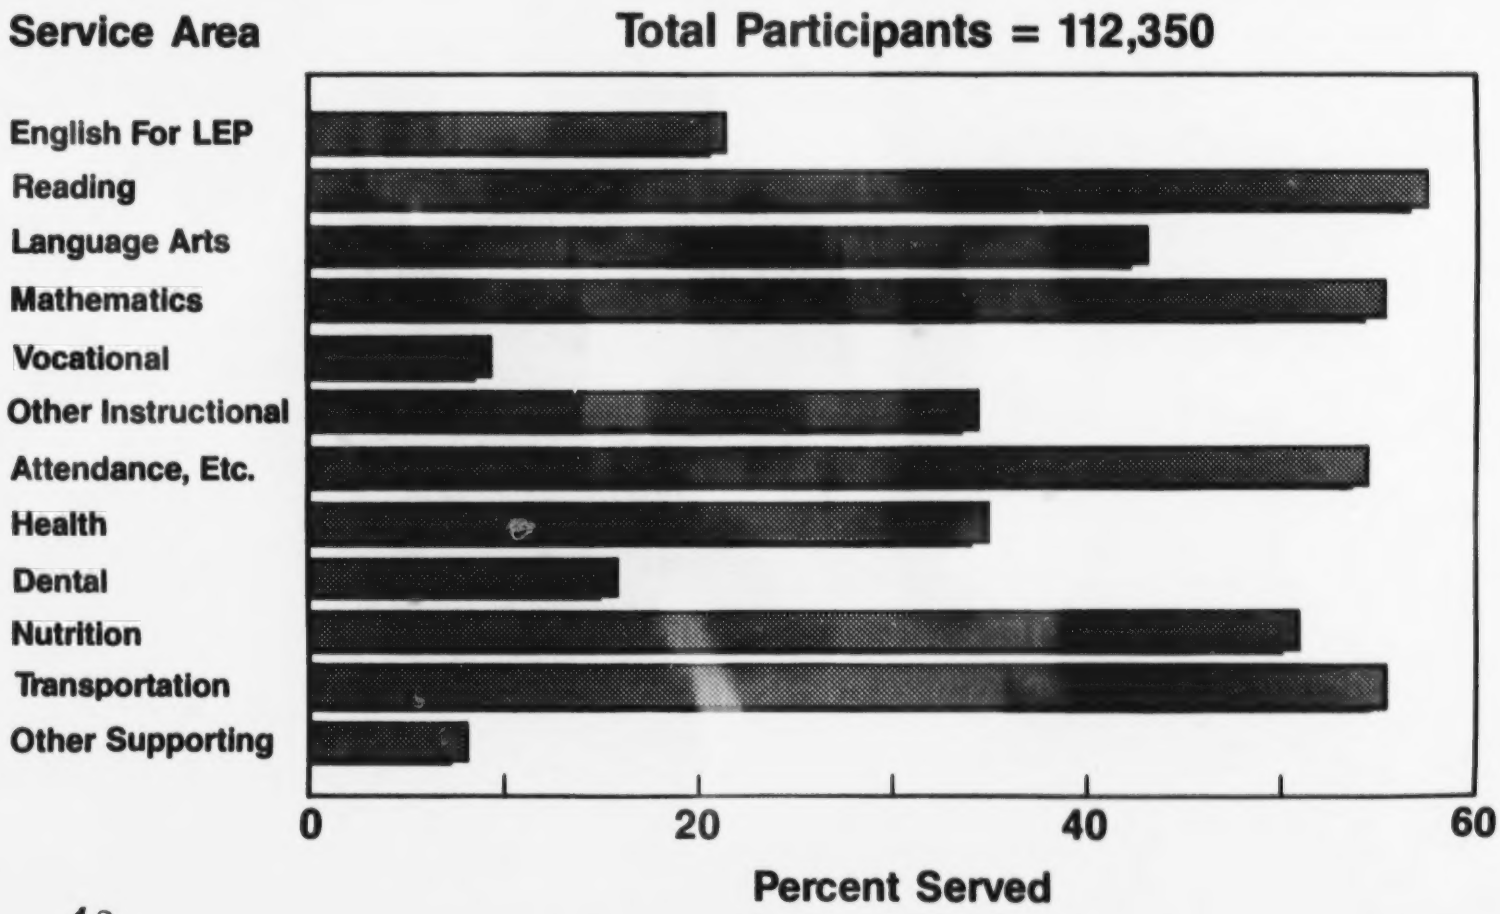
PERCENT OF MIGRANT EDUCATION PARTICIPANTS SERVED BY SERVICE AREA, SUMMER TERM — 1985-86



1984-85, Texas reported only the number of summer term participants receiving supporting services, and not the number receiving instructional services.) (Table 11)

In the summer term, the observed changes were not as heavily influenced by shifts in the states with the largest number of migrant education program participants as was the case in the regular term. Very often, several states reported large increases or decreases, thus accounting for the observed changes. For example, three states reported fairly large increases in the number of participants receiving attendance and guidance services, thus accounting for most of the reported national increase. In other cases, declines reported in some states were offset by increases reported in other states. As an example, one state reported a decrease of about 11,000 participants receiving other language arts, while another state reported an increase of about 8,000 participants receiving that service over the same time period.

* Less than 1 percent.

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota did not offer migrant education programs in the summer term.

In 1984-85, Texas reported only the number of participants receiving supporting services, not the number receiving instructional services.

SUMMER TERM STAFFING

In 1985-86, there were 10,753 FTE staff funded by the migrant education program in the summer term. As seen in the regular term, the three categories of instructional staff composed nearly three-quarters of the total staff in the summer term. In particular, teachers constituted 40 percent and teacher aides 29 percent of the total staff. The next largest percentage was supporting staff at 10 percent. (Figure 10)

Differences were seen in the distribution of staff in the two terms -- in the regular term, there were more teacher aides (43 percent) than teachers (26 percent), whereas in the summer term, there were more teachers (40 percent) than teacher aides (29 percent). (Figures 6 and 10)

Total staff increased 12 percent, about 1,100 FTE staff, from 1984-85 to 1985-86. Increases were seen in five of the eight staff categories. Teachers increased by 30 percent and administrative staff by 28 percent. (California reported a large increase in administrative staff, which accounted for the observed increase in this staff category.) (In examining year-to-year changes, note that in 1984-85, Texas did not report staff information. As a result, the information provided for 1985-86 will account for some of the observed increases.) (Table 12)

Other staff experienced the largest increase, 63 percent. The explanatory information provided by states in their State Performance Reports revealed that the category other staff was composed of clerical staff, bus drivers, clerks, and custodians. The large increase in this category was due to increases among a number of states; for example, nine states reported increases of 30 or more staff classified as other from 1984-85 to 1985-86.

Decreases were relatively small -- curriculum specialists declined 19 percent, teacher aides 7 percent, and staff providing supporting services 2 percent. (Table 12)

a/ Michigan is reviewing the information submitted for both years; revised numbers were not available for this report.

In both years, Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota did not offer migrant education programs in the summer term.

One state (Texas) did not report staff in the summer term in 1984-85.

b/ One state (California) reported an increase of 131 administrators (from 19 in 1984-85 to 150 in 1985-86).

APPENDIX A -- METHODOLOGY

The U.S. Department of Education (ED) received State Performance Reports for 1985-86 in the winter and early spring of 1987, and proceeded to enter the participation information into LOTUS 1-2-3 files.

Decision Resources Corporation (DRC), contracted by the Office of Planning, Budget, and Evaluation (OPBE) to review, correct, and summarize the State Performance Reports, performed edit checks on the participation information and reviewed the achievement information provided by the SEAs. The purpose of the edit checks was to flag potential problems, not to claim that the information was necessarily in error.

The edit process for the participation data focused on examining the information submitted for 1984-85 and 1985-86, and highlighting year-to-year changes that appeared to be unusually high. The fact that 1984-85 was the first year the prescribed format was used was taken into consideration during the review process.

DRC subsequently prepared state-by-state listings of the information submitted by the SEAs, highlighting any data items that were identified through the edit process, and sent them to the SEAs for their review.

DRC staff then placed telephone calls to each SEA to elicit their response. In several instances, SEAs revised data for either 1984-85 or 1985-86.[6] However, in most cases, either the SEA responded that the information had been reviewed and was correct, or the SEA offered explanations for data items highlighted by the review process.

For the achievement data, SEAs were asked to verify or clarify DRC staff's understanding of the information that had been provided to ED.

At the conclusion of this process, DRC entered the revisions into the Chapter 1 migrant education data base and produced two documents for ED--a State Feedback Report for each SEA and this summary report entitled A Summary of State Chapter 1 Migrant Education Program Participation and Achievement Information for 1985-1986, Volume 1: Participation and Volume 2: Achievement.

---

[6]To the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

APPENDIX B -- PARTICIPATION AND STAFFING INFORMATION BY STATE FOR 1985-86

This appendix provides state level tables displaying the participation and staffing information for 1985-86. For each category of information, the number and percent are displayed. The following tables are included:

- Table B.1 -- participation by ethnic group,
- Table B.2 -- participation by migrant status,
- Table B.3 -- participation by gender,
- Table B.4 -- participation by year of birth,
- Table B.5 -- regular term participation by grade span,
- Table B.6 -- regular term participation by grade level,
- Table B.7 -- regular term participation by service area,
- Table B.8 -- regular term staff,
- Table B.9 -- summer term participation by grade span,
- Table B.10 -- summer term participation by grade level,
- Table B.11 -- summer term participation by service area, and
- Table B.12 -- summer term staff.

APPENDIX C -- PARTICIPATION AND STAFFING INFORMATION BY STATE FOR 1984-85 AND 1985-86

This appendix provides state level tables displaying the participation and staffing information for 1984-85 and 1985-86. For each category of information, the number for each year and the percent change from one year to the next are displayed. The following tables are included:

- Table C.1 -- participation by ethnic group,
- Table C.2 -- participation by migrant status,
- Table C.3 -- participation by gender,
- Table C.4 -- participation by year of birth (1984-85 only),
- Table C.5 -- regular term participation by grade span,
- Table C.6 -- regular term participation by grade level,
- Table C.7 -- regular term participation by service area,
- Table C.8 -- regular term staff,
- Table C.9 -- summer term participation by grade span,
- Table C.10 -- summer term participation by grade level,
- Table C.11 -- summer term participation by service area, and
- Table C.12 -- summer term staff.
